About Us

Explorex was born out of empathy and necessity. Empathy for the owners, staff and their customers and the necessity of revolutionising how the restaurant industry operates. It is this zeal combined with the ever-growing trust our partners and investors have in us that drives us to be better each day!

Explorex leverages a full stack operating system designed to suit the needs of the restaurant industry. With 'Bridge' Explorex assists the restaurant's management team by digitizing the orders via QR code ordering tool, integrated POS/MPOS solution, customer re-engagement & recognition tool, inventory management and recipe tool, integrated payments and provides restaurant analytics & reports in an instant. Partners can also manage multiple outlets from a single place, using one single device.
